Wipaire Makes ADS-B More Affordable; Doubles FAA Rebate

South Saint Paul, Minnesota, July 13, 2017 – Wipaire, Inc. is doubling the Federal Aviation Administration's \$500 ADS-B rebate for piston aircraft owners to make ADS-B equipage more affordable. Wipaire's additional \$500 rebate, which can be paired with the FAA program for a total of \$1,000, is available to U.S.-registered single-engine piston fixed-wing manned airplanes registered before January 1, 2016. The Wipaire rebate is applied to installation charges for ADS-B equipment purchased through Wipaire and installed at Wipaire's South St. Paul, Minnesota or Leesburg, Florida locations.

"As a general aviation company of pilots and aircraft owners, we understand the cost burden of adding ADS-B capability to meet the 2020 mandate," commented Clint Cloutre, Vice President of Marketing and Sales for Wipaire, Inc. "We also know that upgrading to ADS-B can offer pilots and owners great benefits, like weather and traffic with no subscription fees. The FAA remains steadfast in the deadline to equip, so we're offering a \$500 rebate to make it easier and more affordable for our fellow pilots and owners to add ADS-B to their aircraft."

Wipaire's rebate is available for work booked by September 18, 2017 and completed by December 31, 2017. Unlike the FAA program, owners of multiple aircraft may claim Wipaire rebates for each aircraft they own though they will still only be eligible to receive one FAA rebate. Owners must purchase ADS-B equipment through Wipaire that meets TSO-C154c, TSO-C166b, or both, for installation at one of Wipaire's two locations. The rebate is not available for equipment purchased or installed elsewhere. No ADS-B performance flight is required to receive the Wipaire rebate.

To help take the mystery out of ADS-B, Wipaire offers a short questionnaire to determine the needs and wants of aircraft owners. To fill out the questionnaire and to receive quotes for a variety of compliance options, visit www.wipaire.com/ads-b.

About Wipaire, Inc.

For over 55 years, Wipaire has been engineering and manufacturing a full line of aircraft floats for all sizes of aircraft from the Piper Cub to the Viking Twin Otter, including most single engine Cessna aircraft. In addition, Wipaire has engineered over 100 Supplemental Type Certificated modifications for improved performance, convenience, and reliability. As a leading aircraft service provider, Wipaire offers maintenance, avionics installation and repair, custom interior design and installation, and exterior paint refinishing across locations in South Saint Paul, Minnesota, and Leesburg, Florida. Wipaire is recognized for its quality products and engineering expertise worldwide.
