

WIPLINE 2350 FLOATS AND WIPLINE 3000 FLOATS

Whether your dream is to fly to the remote glaciers of Alaska's Denali National Park or hop between white sand beaches of the islands, Wipaire can outfit your Maule with the versatility and performance you need. Wipline 2350 and 3000 floats are engineered to offer rugged durability and outstanding performance, giving you the freedom to explore.

FEATURES AND BENEFITS

- Amphibious or seaplane floats available
- Best nose and main gear on the market, proven in the field and imitated by competitors
- Modern hydrodynamic design with fluted bottom skins, sister keels and high bow buoyancy to get off the water quickly and perform in a wide range of conditions
- Enhanced safety with amphibious gear advisory system and gear position indicator on the float deck of amphibious floats
- Non-skid coated, flat top decks for safety
- Two large float hatches for gear, measuring 20 3/8" by 10 1/2" for 2350 floats and 25 3/4" x 12" for 3000 floats with 50 pounds carrying capacity each
- Aluminum skins and parts are laser cut and rivet holes are pre-punched so that replacement parts fit perfectly
- Replaceable wear strips on main keel for ease of maintenance
- Wipline 3000 floats have internal cables for water rudder controls and replaceable keel wear strips

Wipaire also offers skis, modifications, paint refinishing, interiors, avionics and maintenance. Purchase your floats and modifications from the only float company with over 55 continuous years of production and be assured we'll be there when you need support.

WIPLINE AIRGLIDE SKIS

The Maule can be equipped with skis to keep you going all year. Our non-penetration skis offer peak performance on either snow or the runway. Compromised penetration skis result in extra drag from a wheel during a snow landing or take-off and potential damage to the ski on dry ground. Our ski operates as either a full ski OR a wheel at your discretion. Now you don't have to sacrifice performance for convenience!

- Operate as either a full ski or a wheel at your discretion
- Ski is supported by the tire during ski landing for extra stability, shock absorption and support
- Aluminum parts are anodized or epoxy primed ensuring corrosion resistance.
- High density polyethylene bottom skins deliver high performance in slush and prevent freeze down
- Ski hydraulic system is compatible with Wipline floats making the seasonal switch from floats to skis easier
- CT3000 tail ski also available

C3000 SKI SPECIFICATIONS

Dimensions	82½" x 19¾" (2 m x .5 m)
