

WIPLINE FLOATS | MODIFICATIONS | AIRCRAFT SALES  
AVIONICS | INTERIORS | MAINTENANCE | PAINT

**Wipaire requires the following tools for our Paint Technicians on your first day:**

1. Pick Set. (Please note: The Snap-On set is highly recommended as they are stronger, will last longer, and will be replaced by Snap-On if they break).
2. #2 Phillips screw driver – A high quality multi-bit screwdriver is also acceptable.
3. Needles nose pliers and wire cutters.

**The tools below will be required at some point of employment as an employee grows their skill set and progresses in their career:**

1. Socket set: 3/8" drive ratchet and 3/16" – 3/4" sockets. A higher quality set tends to be more compact and the ratchet will have finer teeth allowing easier access to tight spots.
2. Wrenches – A combination open-end set to accompany the socket set.
3. Tape measure
4. Paint gun – high quality and approved by the Paint Supervisor is helpful, but not required.
5. Dual action sander and air drill by the Paint Supervisor is helpful, but not required.

**The following items will be provided to you by Wipaire:**

- Safety glasses
- Ear plugs
- Vapor respirator
- Dust respirator
- Rubber gloves
- Disposable gloves
- Protective clothing (suits, booties, etc.)
